IVÁN FERNÁNDEZ LIMÁRQUEZ

SOFTWARE ENGINEERING GRADUATE

PERSONAL PROFILE

Hello, I'm Iván! A graduate in Software Engineering passionate about creating clean, user-friendly software. Especially interested in frontend development and UX design, but I have experience in full-stack work. I'm fluent in English and Spanish and always eager to contribute.

DEVELOPED PROJECTS

Scubex

Bachelor's Thesis, Social Media app :[Github](#) (React MobX + Spring)

- Developed, documented and deployed a full-stack social network for scuba divers (React, Spring Boot, PostgreSQL) on Vercel and Railway, with Google OAuth, species detection via GBIF API, weather forecasting via Open-Meteo and 137 unit tests achieving over 90% code coverage.

Orquesta elegidos

Web design and development: [Github](#) (React + Vite, Github Pages)

- Developed and deployed web for real client Orquesta Elegidos, an Andalusian music band with over 30 years experience on it's field. Features include news feed updates every 24h, gmail integration for contact and UI design

EXPERIENCE

Click-IT

Barcelona based company: 3 Months

- Developed mainly using react, angular and C# private software solutions, including a ticket management system, a competitor-tracking tool for mesoestetic, and a vehicle management system for La Farga, a public entity managing municipal mobility and parking services in L'Hospitalet de Llobregat (Barcelona).

KnittedForYou

Startup sweedish company: 3 Months

- Developed react components and mainly provided all mockups and user flow for a knitting patterns website
